

RUTH G. CIRILLO

Front End Developer

ruthcirillo.info • rbgloria@hotmail.com • (703) 895-3622

I am proficient in implementing the visual components and interactive features of a web application. My main experience is the presentation layer, but I am capable of filling in the user experience and visual design blanks as needed. I am interested in working for a product company to expand my front end experience.

PROFESSIONAL EXPERIENCE

Senior Interactive Developer at Publicis Sapient

11/2014 to Present

09/2009 to 09/2012

- Develop front end code using HTML, CSS and JavaScript to create multi-browser compatible web applications.
- Implement front end code in chosen Single Page Application framework (React) or Content Management System (Drupal, Adobe Experience Manager, or WordPress).
- Integrate front end interface with REST API.
- Create functional prototypes based on visual designs and wireframe working closely with experience designers and information architects.
- Implement responsive user interface (UI) design.
- Ensure front end code meets accessibility criteria by testing application using Wave browser extension, JAWS and Voice Over.
- Manage front end assets using Gulp.js, Grunt.js, Node Package Manager (NPM) and Bower
- Write automation scripts using Selenium WebDriver, Java and TestNG.
- Create or update UX/UI design documents such as wireframes, Sketch mockups and visual style guides.
- Evangelize design systems by documenting web components, patterns, and color patterns. Document standards and guidelines of use for each component.
- Asses UI designs for technical feasibility and provide level of effort estimate.
- Won "The Half Smoke: the person who packs a punch and shows up extra prepared" award in March 2021.
- Nominated for the "Rookie of the Year" award in 2010.
- Client accounts include National Institute of Health, Food and Drug Administration's Center for Tobacco Products, Bank of America, Marriot International, PenFed, The Library of Congress, Department of Justice, organizations in the U.S. Intelligence community.

User Interface Designer at SAIC

02/2014 to 11/2014

- Collaborated with product manager and business analysts to define user interface requirements.

- Designed and communicated conceptual solutions created in Photoshop with annotations.
- Translate visual designs and wireframes into HTML, CSS and JavaScript while strictly adhering to approved design specifications.
- Documented the application's visual styles and shared components.
- Created UI pattern library and interaction guidelines based on business rules.

User Interface Designer at Serco North America

05/2013 to 01/2014

- Contract and role were transitioned to SAIC on 2/2014.

Front End Developer at CGI Federal

09/2012 to 05/2013

- Refactored front end code to utilize Bootstrap framework.
- Identified and corrected errors for compliance with Section 508 Compliance.
